# APPLICATION DEVELOPMENT & SERVICES

## Introduction

Our modular and incremental services deliver high value. We take a collaborative approach, encouraging our clients to have a level of involvement that works for them rather than restrictive lock-in contracts.

## IT Services

We help businesses reduce costs, improve efficiency and achieve business objectives through our IT services.

## Custom Application Development

The software that suits your specific needs simply isn't available on the market at times. When packaged solutions and software aren't sufficient or flexible enough for your enterprise, Daried can custom-build to your specifications – efficiently and deliver on its promise of certainty.

# IT STAFFING

---

As companies become increasingly more dependent on technology and virtual infrastructure, the demand for world-class IT professionals continues to soar. At Daried IT Staffing, we search for and place candidates with unmatched expertise in information technology.

Daried IT Staffing delivers expert information technology consultants who are able to contribute to a fast-paced and ever-changing technological world. Whether you need to accelerate your IT projects or get your career moving ahead, Daried IT helps you achieve success and ensures growth.

## Expert IT Staffing Solutions

Finding the “perfect fit” for your IT positions doesn’t have to be hard. Fortune 500 and mid-market companies choose “Daried” for their temporary and direct hire IT staffing needs because they know that the personal approach, ongoing support and expert insights they get from an expert staffing leader are what they need to take their IT team to the next level.

# ELECTRONICS

## Introduction

Daried innovates educational solutions that delight, engage and inspire children to reach their potential. We know that children learn best when they're having fun, and that every child learns differently.

With the inception of 21st century, Technology is shaping the way we learn and jobs are created. Pioneer of learning is technical interface and interaction to be the future leaders. With "explore" our mission is to empower students with basics of engineering and technology in a way they love doing it.

The future is now, it's the age of renaissance of technology adaptation and education for everyone. Learn! Leap! Lead!

## Partnering with teachers and parents

We believe that a child's development is a continuous journey that happens one spark, one discovery, one success at a time. Every adventure, every lesson, every curious moment expands a child's knowledge and imagination, building to a greater confidence and passion for what comes next. Nobody knows your child like you do—and no one will have a bigger impact on how they feel about learning. We create resources to help you support their journey, from our personalized Learning Path, to videos and educational kits and fun activities you can share at home.

# QUALITY PROMISE

---

---

Quality is at the heart of everything we do, from the work we do, to the people we work with and relationships we build.

We make sure that we are providing the best outputs by relentless innovation, careful listening and paying attention to details.

We always work transparently, never make any false promises and deliver the work on time. By working in a highly collaborative environment we make sure everyone is on same page and our clients are delighted by our work.
